Extract of a letter from the Secretary of State of New Hampshire, enclosing the returns, dated 9th August, 1823.

"It may be proper to remark, that several of the establishments are merely nominal, having never gone into operation, and that few, if any, of them, have, as yet, occupied capital to the extent allowed by their respective charters. A spirit of enterprize and activity, however, prevails at present, as may be inferred from the number and importance of the societies incorporated the present year. On the whole, there appears good reason to conjecture, that New Hampshire will, at some future period, hold no mean rank as a manufacturing state."

NOTE.—No limited aggregate can be ascertained.

Extract of a letter from the Secretary of State of Vermont, enclosing the preceding schedule, dated 30th November, 1823.

"The remarks in the fifth column of the accompanying Schedule, though not within the requisition of the Department, appear to be necessary, in order to convey accurate information of the situation of several of these incorporations; and it is believed that several establishments to which, in the list, no remarks are affixed, are not, at this time, in operation. It may be proper to remark, that a list of incorporated factories will not furnish an accurate estimate of the manufactures of the State, as much of the capital employed in manufacturing is vested in private and unincorporated factories."

NEW-YORK.

A LIST of such Articles and their Market Value, annually manufactured for sale, in the State of New-York, as would be liable to duties, if imported from foreign countries; as, also, the amount of Capital invested in each county, respectively.
